

## EXOME SEQUENCING DIAGNOSTICS

### Diagnostic Exome Sequencing includes:

- Exome Sequencing
- Exome data analysis\*
- CNV analysis
- Clinical interpretation and reporting

*\* Exome data analysis is performed using an in-house developed bioinformatic pipeline and with variant filtering according to the requested in silico exome gene panel (see below). Exome -wide analysis is also an option (informed consent for return of incidental findings is needed).*

### Cost and turnaround time (TAT):

- Price: €750 per single exome or €1.550 per trio analysis \*\*
- TAT: 2 months
- Rapid WES (trio, TAT: <15 business days and €3000)

*\*\* Reanalysis or exome-wide analysis of existing GDNM exome data is offered for an additional €400.*

### Available exome gene panels:

*Scan the QR-code for a list of our available exome gene panels.*
